Table 3: Odds Ratios Predicting the Relationship Between High-Net-Worth (HNW) Respondents and Their Preferences ($N = 1,000$)							
	Interest in building financial education	Importance of incorporating ESG factors	Prefers active management ($n = 820$)	Likelihood of hiring an adviser ($n = 317$)	Confident in my own abilities to invest ($n = 202$)	Want asset allocation advice from existing or new adviser ($n = 798$)	Satisfaction with existing adviser ($n = 683$)
HNW	1.42*	0.93	1.19	1.01	1.53	1.36	1.26
Controls	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Adjusted R^2	13.89	15.76	2.14	24.46	9.96	2.38	2.11
Wald X^2	174.47	152.32	13.86	72.27	14.28	14.03	10.84
